Instrucciones: Use the family tree diagram to answer the questions in complete sentences.

Nombre: _____

mi árbol genealógico

1. ¿Quién es la madre de Marcos? _____
2. ¿Quién es el abuelo de Ricardo? _____
3. ¿Quién es el hijo de Roberto? _____
4. ¿Quiénes son los primos de Paola? _____
5. ¿Quién es la sobrina de Roxana? _____
6. ¿Quién es la esposa de Roberto? _____
7. ¿Quiénes son las hijas de Fernando? _____
8. ¿Quién es la hermana de Mariana? _____
9. ¿Quién es el tío de Ricardo? _____
10. ¿Quién es el primo de Mariana? _____
11. ¿Quién es la abuela de María? _____
12. ¿Quiénes son los nietos de Camila? _____
13. ¿Quién es el padre de Roxana? _____
14. ¿Quién es el hermano de María? _____
15. ¿Quién es el esposo de Camila? _____
16. ¿Cuántos hijos tienen Fernando y Roxana? _____
17. ¿Cuántos sobrinos tienen Fernando y Roxana? _____
18. ¿Cuántos nietos tienen Eduardo y Camila? _____
19. ¿Cuántos hermanos tiene Ricardo? _____
20. ¿Cuántos primos tiene Marcos? _____

straw.

The second pig made his house out

of sticks.

The third pig made his house out of

bricks.

How many of the pigs did the Big

Bad Woolf eat? _____

Color by number - shapes & "Circle, triangle, square, rectangle - a worksheet Learning checkMeasurement CheckMeasurement CheckThis Resource will help to assess mastery of the concepts of your students surrounding measurement and time. This worksheet will challenge your third grade students with problems on area, perimeter, measurement and time problems spent. Here is a spring treasure hunt that uses all the senses to explore the great open spaces. It is a wonderful way to absorb the days becoming a little longer, the air becomes a little warmer and the great thawing that promises new life. What you need: Instructions: 1. Print the treasure hunt. Click on the images to open the PDF. 2. If you want to reuse again and again the treasure hunt into a plastic page protection or laminare. Use a dry marker to mark objects while you find them. 3. I suggest you insert the list on the notes and tie the marker or pencil in the notes. This makes the activity easier for children (and parents - no longer lost indicators!). 4. Get dressed for time and move on! Word problems can be challenging for students, especially for the second grade, who may still learn to read. But you can use basic strategies that work with almost all students, even those who are just beginning to learn written language skills. To help second-grade students learn to solve word problems, teach them to use the following steps: Study the mathematical problem: Read the problem of words to have an idea of its general nature. Talk to your students about the problem and discuss which parts are most important. Read the math problem: read againThis time, focus on the specific details of the problem. What parts of the problem are related to each other? Ask questions about the operations involved: reflect again. Determines specific mathematical operations that the problem asks you to perform and list them on the card inInMust be executed. application for the adopted steps: a review each step you have made. determines if your answer seems reasonable. if possible, check your answer to the book responses to determine if you are on the right path. list them and determine their meanings before solving problems. Write short term definitions for your reference during troubleshooting. after examining these strategies, or the following free printables for the problem of words to allow students to practice what they have learned. There are only three worksheets because you don't want to overwhelm your second grade students when they're just learning to do word problems. start slowly, review the steps if necessary and give your young students the opportunity to absorb information and learn the techniques of troubleshooting words at a relaxed pace. Printables contain terms with which young students will be familiar, such as triangle, square, staircase, dimes, nickels and days of the week. d. russell this printable includes eight problems of mathematical words that will seem rather prolific for second-grade pupils but actually are quite simple. problems of this worksheet include word problems formulated as questions, such as: "You saw 12 robins on a tree and 7 on another tree. How many robins have you seen altogether?" and "your 8 friends have all 2 bicycles on wheels, how many wheels are entirely?" if the students seem puzzled, read the problems out loud with them. explains that once you strip the words, it is actually simple problems of addition and multiplication, in which the answer to the first would be: 12 robins + 7 robins = 19 robins; while the answer to the second would be: 8 friends x 2 wheels (for each bike) = 16 wheels. d. ilicaf ilicaf eud ad eritrap a ednamod ies onnareroval itneduts ilg ,elibapmats otseuq us followed by four more of increasing difficulty. Some of the questions include: "How many sides are on four triangles?" and "A man was carrying balloons but the wind blew 12 away. He has 17 balloons left. How many did he start with?" If students need help, explain that the answer to the first would be: 4 triangles x 3 sides (for each triangle) = 12 sides; while the answer to the second would be: 17 balloons + 12 balloons (that blew away) = 29 balloons. D. Russell This final printable in the set contains slightly more difficult problems, such as this one involving money: "You have 3 quarters and your pop cost you 54 cents. How much money do you have left?" To answer this one, have students survey the problem, then read it together as a class. Ask questions such as: "What could help us solve this problem?" If students are unsure, grab three quarters and explain that they are equal to 75 cents. The problem then becomes a simple subtraction problem, so wrap it up by setting up the operation numerically on the board as follows: 75 cents - 54 cents = 21 cents. Coordinates for Kids: Ho, Ho, HoCoordinates for Kids: Ho, Ho, HoYour fourth grader can save Christmas by helping Santa decipher an important code. As they help Santa, they'll be getting some important practice with coordinates. A Printable Grade Book Template Do teachers need a grade sheet? For children who are at the formal education or school level, having grade sheets is an absolute part. Providing grade sheets is the obligation of a teacher. The grade sheet will become a report to find out the development of children's learning to parents. Teachers will really need it and usually, every school has its own grade sheets which are sometimes different from other schools. Therefore finding different variants of grade sheets is not something to be bothered with. Why so many kinds of grade sheets? As discussed, different grade sheets are not unusual.
